Montreal, Quebec H3A 3G4

TABLE OF CONTENTS

Subject	Page	Subject	Page
Abbreviation & Reference Marks, Explanation of.....	2	Geographical List of Stations	4
Alphabetical List of Stations.....	3	Rules.....	2

RULES

Rule 1. (a) This table contains the official distances between all Quebec North Shore & Labrador Railway Company stations.

(b) Agents must be governed entirely by this Official Distance Table, for kilometres to be used in arriving at freight rates and passenger fares in connection with distance tariffs.

Rule 2. In computing the distance governing freight traffic handled under distance rates to unloading, or from loading sidings to or from other points not named as stations herein, the kilometres published to or from the nearest station or point thereto shall be used.

Rule 3. Distances between stations where no junction point intervenes must be computed by taking the differences in the kilometres opposite the stations between which the distance is required.

Rule 4. The distance between stations where a junction point intervenes must be computed by adding the distance to and from such junction point.

Rule 5. If in figuring-distances it is found the total of all factors end in a fraction, the fraction must be counted as one kilometre, for example:

Sept-Iles, Que. To Schefferville, Que. 575.2 kilometres = 576 km

EXPLANATION OF ABBREVIATIONS AND REFERENCE MARKS

Abbreviation and Reference Marks	EXPLANATION
Jct.	Junction.
Km	Kilometre
Nfld.	Newfoundland
No. (s)	Number (s)
Q.N.S. & L.	Quebec North Shore & Labrador Railway Company
Que.	Quebec
Ry.	Railway
St.	Street
①.	Open Station
②.	Prepay Station.
③.	Interchange point for carload traffic only
▲.	Change in wording which result in neither increases or reductions in charges.
