Public Notice: Fuel Surcharge – QNS&L – General Freight Service

Effective November 1st, 2026, QNS&L will adjust its fuel surcharge to better reflect current market conditions.

The new rate applicable across the rail network will be set at 3.54%, replacing the rate previously published on October 1st, 2026.

This adjustment is part of our new fuel surcharge policy, which is designed to provide a more transparent and predictable approach that better reflects fluctuations in fuel costs.

Freight rates remain unchanged and will be reviewed at a later date. The fuel surcharge applies to all freight transported on the QNS&L rail network, including interline traffic.

For more information about our approach and the methodology used to determine these adjustments, please refer to the fuel surcharge policy available on our website at www.QNSL.ca.

Yours sincerely,

Patrice Tremblay
Commercial Director, Rail and Port
